Vision and Mission

To have a vision is good.
To know the path to a vision is great.
To fulfil the vision is history.
As we are talking about history, here is a department that has an impeccable placement record and unbeaten academic excellence.

ABOUT

Every student who passed out of this computer science and engineering department has always had a great kick start to his or her career and didn't look back, even for a second. This institution has a proud history of over 25 years, and one of the brightest stones in that crown is the strength of the IT professionals we are providing to this country.

All this is possible only through sure-shot planning and execution by our faculty members, HOD, and the student pioneers. I am indeed privileged to be at this stage and I wish to see this department reach greater heights and bring more glory for our institution. I hereby congratulate and felicitate the members and representatives of this computer science and engineering department.

DR. K. PORKUMARAN
PRINCIPAL

There is a saying by Sir Oprah Winfrey **"Education is the key to unlocking the world it is the passport to freedom"**

This throughly expresses the view and vision of the computer science and engineering department. The students who choose this branch will definitely be strong in academics, but the way their skills are shaped and carved by our faculty members and inter-organizations inside the department is magnificent. Each and every student there will definitely have been through a highly competitive environment throughout the learning phase, and this makes them strong and reliable employees for multi-national companies.

This entire credit and pride goes to the management staff and representatives of the department, and to the head of the department as well. I am indeed proud to say that this is one of the best branches that we have in all the sectors, let it be placement university rank, extracurricular events, hackathons and so on. Students are privileged to have such faculty members. I conclude by thanking you for having me on this stage, and I wish to see greater heights for this branch.

DR. B. LATHA
HEAD OF THE DEPARTMENT

I congratulate the faculty and students of the Computer Science and Engineering departments for organising Synsara 2k22, a National-level symposium. We seek to be renowned for our distinctive curriculum emphasising work-integrated learning, learning-based work, problem solving, and cross-cultural skills. Our experienced faculty are the strong pillars of the department, whose focus is to empower a diverse community of students to nurture their capabilities, transform their lives, and find success through high-quality teaching and learning. I am indeed proud to be a part of this esteemed organisation and I feel immense pleasure in being the head of the department for computer science and engineering. I hear-by congratulate the editorial board for their concerted efforts in bringing out this newsletter .

SHE IS INDIA

She bears us irrespective of any race
Making our lives a bit craze
She boosts us by giving food
Making our body feel good
She helps us thrive when we wrinkle
Making our eyes twinkle
She bears a tricolour flag flying high in glory
Thus protecting us from the adversary
As proud as peacock there she trains
As calm as a millipond there she remains
Wondering who she is?
She is she who she should be wannabe

एक जवाब/प्रश्न

मैं स्तंभ देखता गया
और निश्वद सुनता रहा
बड़े शांति से अपने भीतर के प्रश्नों को,
सच की गहराई में गुनता रहा
बैचेनियों और आडंबरो के बीच भी
मैं स्तभ होकर, चरित्र को बुनता रहा....

HELICOPTER OF THOUGHTS, AND HOW TO LAND WITH MINIMAL DESTRUCTION.

-Aswati Harikumar

Dearest readers, let's clear the air here (pun unintended)- being the writer of this, I'm technically supposed to know how to safely land the "helicopter" of thoughts, but get ready for a crazy ride because I ain't got no clue if the controls of the helicopter are even in here. Now that the disclaimer on my part is done, let's get into the thick of things

Let's all take a moment to think about our brains- the convoluted cerebral cortexes that encompass a multitude of neurons in them- magnificent isn't it? Apart from its physical structure it has the ability to generate neural pathways that stem from the environment, and other sensory factors- what we shrink into one word- thoughts. This word is the reason that human brains have been awarded the title of "highest level of consciousness" among every living species. That's pretty biased if you ask me—isn't the human brain rewarding itself for being the greatest? Has anyone recently spoken to a porcupine? I think it has the right idea of keeping every species at arm's length with its quills. Also, if what the scientists mean by consciousness includes obsessively replaying a disastrous conversation from seven years ago-then well done, humans as a species are thriving indeed.

"Life is like a beautiful melody only the lyrics are messed up"

So when I talk about music it automatically makes me feel happy. I love music. It plays a vital role in everyone's life. Why it is so important? How music can change a person's life? Let me share my views regarding music. It helps me to bring out my creativity. Music is my favorite hobby that I loved more. Whenever I feel sad or happy I listen to music, so whatever I do music is being involved in that.

It helps me to get rid of my stress and anxiety. When I hear melody music it makes me remember my old memorable days. It makes me feel fresh and pleasant.. There is no age limit for music. Even sometimes music can help us to **analyze** our own mistake. Some may hear music since they feel bored or some may love the lyrics or some may love the tone, but whatever the reason music is being loved by all in their own perspectives.

Indeed, music can heal people in many difficult situations. Even a doctor can feel stress-free if music is there. I even read an article where the patient tells that music helps us to heal her pain fast Music can really heal patients, it really makes the patient mind to feel calm and healthy. For instance if you are having a fight with Your sibling and Your anger is really extreme in that case u can just start to listen to music it will automatically relax u. If u feel lonely, then one and only best option is music, it will not make u to feel lonely. So like these, there are many instances why music is really important in life. Its really gifted if you are skilled in music.

let me end my blog with the famous quotes

"THERE IS MUSIC IN THE AIR,MUSIC ALL AROUND US,THE WORLD IS FULL OF IT, AND YOU SIMPLY TAKE AS MUCH AS U REQUIRE"
